Bella

THE “MOST BEAUTIFUL” CORNER OF TERME DI SATURNIA

Terme di Saturnia presents a new selection of treatments using the innovative technology of CELLU M6® - Alliance, a new technology designed to reactivate the cellular activity at the heart of our skin and fight against all the imperfections with results immediately visible. LPG® endermologie offers a 100% natural alternative for a beauty that comes from within: the treatment heads allow to send signals to the cells, thus obtaining incredible results in a completely natural way. During the first session, an evaluation is carried out by Terme's beauty specialists of Saturnia to choose the type of program best suited to the goal to be achieved.

ENDERMOLOGIE® FACE OR BODY • 50 min € 100

ENDERMOLOGIE® FACE + BODY • 80 min € 180

Non-invasive method of mechanical stimulation of the connective tissue that allows to reactivate natural physiological processes. A triple action in a single treatment: reduction of localized fat, smoothing of orange peel skin, firming of the skin. It represents a real fitness session for the skin, awakening the natural synthesis of substances essential for youth, stimulating the fibroblasts to the production of endogenous collagen, elastin and hyaluronic acid.

OXYGEN INFUSION • 50 min / 80 min € 210 / 290

Deep hydration - oxygenant and anti-wrinkles

The pure oxygen treatment helps to spread the active principles into the deep skin layers of the face, increasing the levels of oxygenation, producing an overall calming effect and leaving the skin smoother and more toned. It also reduces wrinkles and adds volume. It increases oxygenation levels, strengthens and improves volume.

GOLD FACE EXPERIENCE • 80 min € 210

Antioxidant and tonifyer

It begins with a thorough cleaning of the skin with thermal mud and purifying serum, continuing with a gentle massage of the face and concludes the experience with a final mask with very thin sheets of 24-karat gold. The high antioxidant and lightening power of gold can activate the production of collagen and elastin and the final application of a gel with silk extracts makes the skin smoother and velvety.
